### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The prior art of record does not provide for, nor suggests providing for a system for displaying a first frame and a second frame which acquires and renders web content independently from a Web browser program. The display of the first addressed content and the second addressed content is at least in part outside of a window of the Web browser program, and the content comprises at least a portion of a definition of the frame for the content. The system records starting and ending times for when the first and second addressed content are displayed on the computing device, and then reporting when the first and second content were displayed during overlapping time periods. The first and second addressed content are completely independent from any web browser program which may be resident on the client device. As such the first and second addressed content are acquired and rendered independently of any program which may be able to display a web page. The addressed content carries with it a portion of the definition of the frame within which the content is displayed. The addressed content is that which is shown in Figure 9B. The addressed content 137 has a frame definition 133 and content 135 which are all independent of a web browser program such as Internet Explorer or Netscape. The closest prior art would be the current rejection Wolfe-Ko-Himmel-Merriman, however the prior art does not provide for the content being acquired and rendered independently of a Web browser program. Wolfe discloses displaying content in windows independent of a Web browser program, yet does not show acquiring the information independent of the Web browser program. For these reasons,

in conjunction with the other limitations of the independent claims, puts this case in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Specification***

Applicant's submission of a substitute specification as originally filed as requested by the Examiner has been acknowledged and entered.

Applicant's submission of amendments to the specification have been considered and acceptable. The amendment is entered.
